Professional Summary

Entry-Level Data Analyst with internship experience and hands-on expertise in SQL, Python, Power BI, Tableau, and Excel. Built end-to-end analytics solutions across hospitality, HR, and retail domains, including predictive modeling, KPI dashboards, and business reporting. Skilled in transforming raw data into actionable insights for decision-making.

Experience

Data Analyst Intern | AI Variant

Mar 2026 – May 2026

Hospitality Analytics *Power BI | SQL | Excel* [View Project]

- Analyzed 134,000+ hotel booking records using SQL and Excel to evaluate revenue, occupancy, and booking trends.
- Built an interactive Power BI dashboard tracking Revenue, Occupancy Rate, ADR, RevPAR, and Cancellation Rate through 8+ KPI visualizations with dynamic filters and drill-down analysis.
- Identified booking segments with cancellation rates exceeding 20% and highlighted revenue leakage opportunities for business decision-making.
- Presented analytical findings through 5+ business reports and dashboard reviews, enabling stakeholders to monitor key hospitality performance metrics.

Projects

Customer Shopping Behavior Analysis *Python | SQL | Power BI* [View Project]

- Examined **3,900+ customer transactions** to identify purchasing patterns and customer segments.
- Performed data cleaning and exploratory analysis to understand consumer behavior.
- Created **10+ visualizations** to uncover sales trends and product preferences.
- Generated recommendations highlighting customer groups contributing over **60%** of purchases.

HR Attrition Rate Analysis *Python | Excel | Tableau* [View Project]

- Built a **Random Forest Classifier** using **1,470 employee records** and **35+ workforce attributes** to predict attrition.
- Performed data cleaning, feature engineering, and exploratory analysis to prepare data for predictive modeling.
- Identified key attrition drivers including overtime, job satisfaction, income level, and tenure.
- Developed an interactive Tableau dashboard with **6+ visualizations** to monitor attrition trends and retention metrics.

Technical Skills

Programming & Query Language: SQL (MySQL, PostgreSQL, SQL Server), Python (NumPy, Pandas)

Visualization : Power BI, Tableau, Matplotlib, Seaborn

Tools : Microsoft Excel, Jupyter Notebook, Git, GitHub

Analytical Skills: Data Analysis, Business Analysis, Statistical Analysis, Descriptive Analytics, Diagnostic Analytics.

Core Competencies : ETL, Data Cleaning, Data Transformation, Data Modeling, KPI Tracking, DAX, Power Query, Business Intelligence, Dashboard Development, Reporting.

Soft Skills: Presentation & Communication Skills, Analytical Thinking, Data Storytelling, Detail-Oriented

Education

Bachelor of Technology (Computer Science and Engineering)

May 2026

Rajiv Gandhi University of Knowledge Technologies

CGPA: **8.84**

Certifications

- Data Analysis with Python – Developer Certification by freeCodeCamp
- Data Analytics Program [SQL, Excel, Power BI, Tableau]– from ExcelR

July 2025

May 2026
